Product description:

WKR - Whirl massage device for lower limbs and spine

Whirl massage device WKR is designed for rehabilitation of lower limbs and spine. Whirlpool massage baths are especially recommended for post-traumatic and rheumatic conditions, as well as for relieving fatigue of the musculoskeletal system. The WKR device provides effective 2-zone whirlpool massage, and its functionality will meet the expectations of even the most demanding users.

The device is sold together with the steps.

Features:

Basin available in two colours: White or Calypso Green

Basin made from gelcoat (fibreglass mat reinforced)

Water usage: minimum 75 liters (for the lower limb massage zone)

Whirl massage via 12 adjustable directional jet nozzles

Two zones of massage: I – Lower limbs (seventy-five liters). / II – Spine (one hundred sixty-five liters).

„Dry-run” pump protection system

Massage intensity adjustment by supplying air to the jet nozzles (independently for each zone)

Electronically controlled descaling system

Electronic control panel

Maximum treatment time: 30 minutes

Temperature sensor

Water level sensor

Automatic filling

Emptying via drain knob

Shower head

Advantages of the WKR - Whirl Massage Device for Lower Limbs and Spine

The whirl massage device allows users to customize various settings to suit individual preferences and needs. Adjustable massage intensity and water temperature ensure a personalized experience.

Thanks to its customizable parameters, the whirlpool is ideal for addressing various foot ailments, such as fatigue, pain, or swelling. The therapy is individually tailored to the user's needs.

Easy-to-use control panels enable intuitive adjustment of massage settings, ensuring a comfortable and user-friendly experience.

The whirl massage device features an ergonomic design that conforms to anatomical shapes, maximizing comfort during therapy.
