Product description:

Stand Up Sling - vertical suspension with clips (e-clip)

The vertical clip suspension (e-clip) is designed to stabilize and support the patient during transport and during verticalization activities in lifts intended for sitting. This solution is designed for people who want to maintain mobility, build muscle strength and actively participate in daily activities.

Thanks to the full padding, stable construction and ergonomic fastening system, the hanger provides maximum comfort, safety and support during verticalization. It is ideal for both home care and medical facilities.

Purpose:

- for patients starting or continuing to learn to stand up,
- for people who want to strengthen their muscles and maintain mobility,
- cases of limited stabilisation of the lower limbs and torso (maintained head stability required),
- use of vertical lifts in home or medical conditions.

Why choose this sling?

- increases the patient's independence and active participation,
- supports strength, stability and posture control,
- ensures safety thanks to double fastening systems,
- offers comfort thanks to full padding,
- enables safe transport and verticalization.

Clip-on fastening system (e-clip)

Stable, comfortable and safe in everyday use.

Full padding

Provides high comfort even with frequent use.

Secure fastenings

Hook & loop and clunk-click buckles provide additional stability and patient safety.

Rehabilitation support

Helps maintain mobility and build strength – supports the rehabilitation process and active participation in movement.

Ergonomic movement pattern

Improves the quality and safety of verticalization (facilitates the natural movement of getting up).

Easy maintenance

Can be washed at 85°C and dried at low temperatures (up to 50°C).
