CORDOBA - Alternating shower (Scotch douche)

Product short description:

Alternating (Scotch) shower combines the effects of pressure on the body (massage effect) and temperature change (which increases physiological responses to the treated area). CORDOBA is a modern device equipped with two thermostatic mixing valves, for a quick and easy way to set the temperature of the water which is delivered to each applicator (gun) separately. If water installation do not meet the technical requirements and does not allow for the proper operation of the device, we suggest to order optional pump to equalize pressure of water in the system.
