

Orkan NBC1 - Jet shower

Product short description:

Scottish whips - Orkan NBC1 shower chair is a freestanding device for generating Scottish whips. Orkan NBC1 shower chair is equipped with 2 independent rotating nozzle-pistols, each with adjustable water jet dispersion, 2 independent thermostatic faucets for temperature control, 2 thermometers, 2 pressure gauges and 2 massage intensity control valves. Orkan Scottish whips are designed for therapeutic treatments using mechanical and thermal properties of water.

Delivery time is 8-12 weeks.

Product description:

Orkan NBC1 - Jet shower

Orkan NBC1 designed for therapeutic treatments that use the mechanical and thermal properties of water. Thanks to the stimuli caused by the water jet and the rapid change of temperature, the therapy is characterized by various effects on the patient's body, including stimulation or sedation, hardening, and increasing or decreasing blood pressure.

The Orkan NBC1 jet shower affects the patient's body by combining the force of water pressure and its temperature. An appropriately strong stream of water is directed at the patient by means of jets. In the case of massage jets, it is possible to change the water stream by means of a sprayer. The therapy can produce stimulating or calming effects, depending on the strength of the water jet and its temperature.

Free-standing console (permanently installed), made of plastic reinforced with glass fibre.

Water system consists of copper tubes and hoses braided with acid-resistant steel.

Two massage nozzles for jet showers.

Two manometers for pressure indications (independent for each nozzle).

Two thermometers for temperature indications (independent for each nozzle).

Water dispersion adjustment via sprinklers (independent for each nozzle).

Two thermostatic mixing valves for independent temperature adjustment for the two nozzles.

The ability to work with two nozzles at the same time.

Two pressure (water stream intensity) adjustment or shut-off valves (independent for each nozzle).

The nozzles are equipped with a lever that opens the stream of water and a lock allowing for continuous jet shower.

Four adjustable feet for leveling the device.

Technical data

Hot and cold water pressure [bar]:	4-6
Maximum hot water temperature [°C]:	60
NBC1 dimensions (H x W x D) [cm]:	111 x 64 x 54

Before making a purchase, please read the installation card (**see the Attachments tab**) and verify the transport route of the device, taking into account its dimensions and weight.
